

Aquablanc

Aquablanc Oxygen Liquid *with Algaecide*

Key Features/Characteristics

- 🔑 Oxygen Liquid with built-in Algaecide
- 🔑 Use with automatic dosing system
- 🔑 Gentle sanitiser
- 🔑 Minimal odour – pleasant pool environment

Maintain pH levels within the ideal range of 7.0 – 7.4.

Aquablanc Oxygen Liquid with Algaecide should only be dosed via an automatic dosing system.

Before converting a pool to Aquablanc Oxygen Liquid *with Algaecide*, shock dose with Blue Horizons Granular Shock, Rapid Shock or Shock 'n' Floc to a minimum of 10mg/l free chlorine. The pool should then be maintained at this level for a minimum of 48 hours.

Application Instructions

- 1) Add 0.5ltr of Aquablanc Oxygen Liquid *with Algaecide* per 10m³ (2,200 gallons) of pool water per week.

If the swimming pool has a high bather load or the water temperature is above 28°C the Aquablanc Oxygen Liquid dose will be automatically increased by the temperature compensator on the automatic controller.
