

AquaSPARKle Hot Tub Conditioner **Aqua Sachet**

Key Features/Characteristics

- 🔑 Liquid Aqua Sachet
- 🔑 Prevents biofilm formation in spa pipework
- 🔑 Enhances quality and feel of spa water

Hot Tub Conditioner contains a blend of compounds to enhance the quality and feel of water, reduce chemical consumption and prevent biofilm formation in pipework.

Application Instructions

1. Maintain sanitiser and pH levels within the desired operating ranges.
2. On opening the sachet via the “scissors cut area”, pour the whole sachet of Hot Tub Conditioner directly into the hot tub water.
3. For optimal results, **Dose weekly**: one 80ml sachet per 1,000 litres (220 gallons) of spa water.

Note: Shake well before use.
