

AquaSPARKle Ezy-Float

Key Features/Characteristics

- 🔑 2 x 80g Mini pre-filled floating dispenser
- 🔑 Ideal for smaller hot tubs and inflatable pools
- 🔑 Convenient 2 – 4 week treatment

Ideal free chlorine range: 3 - 5mg/l (1 – 3mg/l for swimming pools)

Prior to using this product adjust the pH level to the ideal range 7.2 – 7.6.
This floater releases chlorine slowly over a period of 2 to 4 weeks depending on water flow.

Application Instructions

1. Read the label thoroughly before removing the sleeve via the double perforation marks.
2. Rotate the base of the floater to expose one to three holes. As a guide, expose one hole per 150 gallons (680 litres), although water flow will affect tablet solubility.
3. Place the Ezy-Float dispenser in your hot tub or pool water in an upright position.

Note: chlorine consumption will vary depending on heat, bather load and weather.
