

## Blue Horizons JellyCLEAR Cubes

### Key Features/Characteristics

- 🔑 New 70g floc cube
- 🔑 For sand & cartridge filters

Blue Horizons JellyCLEAR cubes are clarifier gel blocks that assist the filter to remove small suspended particles to ensure sparkling pool water. This product is relatively pH neutral.

### Application Instructions

1. Ensure algae are pre-treated (previous 24 hours to release algae from walls prior to using JellyCLEAR Cubes. Adjust pH to desired range 7.2 – 7.6.
2. Backwash the filter (or clean the cartridge) and then return to the normal filtration setting prior to use.
3. Peel off the protective plastic film and insert the JellyCLEAR cubes directly into a clean and empty weir or skimmer basket.
4. JellyCLEAR Cubes will dissolve over a period of 3 – 4 days depending on water flow from the filtration cycle. However, this duration cycle is not significant as the active ingredients have a long lasting residual effect beyond their disappearance.

Dose Rates		
Water Volumes		To Clarify Water for two weeks
Litres	Gallons	Dose Rate
Under 50,000	11,000	1 Cube
50,000 – 100,000	11,000 – 24,000	2 Cubes

**Note:** Always ensure that the skimmer basket is clean and free of debris whilst the JellyCLEAR Cubes are dissolving.
