

Blue Horizons *Ultimate* Stabilised Chlorine Granules

Key Features/Characteristics

- 🔑 Fast dissolving stabilised chlorine granules
- 🔑 Contains clarifier & Algaecide
- 🔑 Used for daily disinfection
- 🔑 Minimal effect on pH
- 🔑 Part of the **BOAST** System

Ideal free chlorine range: 1 - 3mg/l (ppm)

Application Instructions

1. Maintain pH level within the ideal range of 7.2 – 7.6. If the not in this range, adjust.
2. This product may be applied directly to pools where temperatures exceed 20°C. If below this temperature or in doubt pre-dissolve this product in a clean plastic container at a maximum rate of 100g of product per 2.2 gallons (10lt) of water. Stir well to ensure product is fully dissolved. Add the resulting solution to the pool or spa whilst the pump(s) are turned 'on' preferably near the water inlets to aid distribution.
3. Repeat dose application if necessary to achieve ideal chlorine levels.
4. It is recommended that you periodically (e.g. weekly/fortnightly) shock or oxidise your water, using Blue Horizons Pool Fusion, Granular Shock, Rapid Shock or Shock 'n' Flocc.

Daily Dose Rates			
Water Volumes		To increase Chlorine Level	
Litres	Gallons	1mg/l	3mg/l
1,000	220	2g	6g
4,545	1,000	9g	27g
22,700	5,000	45g	135g
45,450	10,000	90g	270g
68,175	15,000	135g	405g

NOTE: Hot weather, high pool use or heavy rain may require a higher daily dose rate.
